

BOILER LEVEL INDICATOR GAUGE, REFLECTIVE

Material steel / Borosilicate glass
Pressure PN 16

TECHNICAL DESCRIPTION

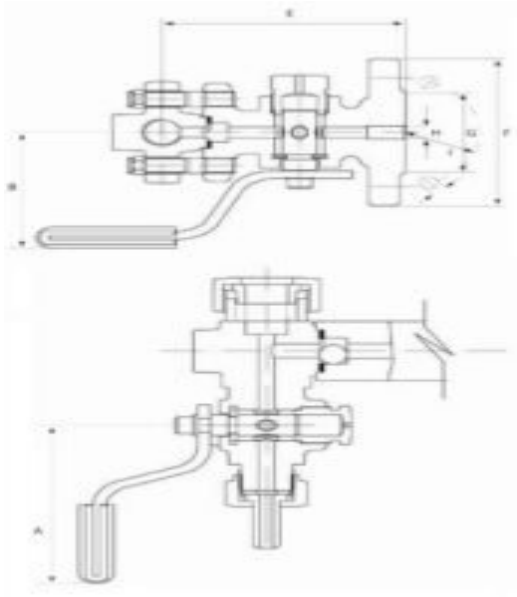

Indicator level gauge with reflective glass. Suitable for steam and water installations, as well as for use as equipment in steam boilers. Used in combination with two valves at the top and bottom end, to equalise fluid level in connected vessels.

ADDITIONAL FEATURES

- Extension of the construction length by adding additional bodies
- The structure is made entirely of stainless steel

EXECUTION

According to the size chart.

No.	DETAILS	MATERIALS	SPECIFICATION	
1	Body of the crane	steel 1.0619	Standard	DIN
2	Sealant	graphite		
3	Column material	1.0619+N		
4	Glass	borosilicate		
5	Pipe	steel 1.0619		
6	Bolts	steel 1.0619	P max. 22 barg	T max. 216 °C

BOILER LEVEL INDICATOR GAUGE, REFLECTIVE
